Abstract

This is the homework for June 26, 2014. It contains a description of the comparison of different SAM files

1 Section 1

2 Hypothesis: SRA82660 sequence is not part of the *Neurospora crassa* genome

A hypothesis is that the SRA82660 sequence is not part of the *Neurospora crassa* genome, and it belongs to another species.

```
TEST IF SRA82660 SEQUENCE IS PART OF THE Neurospora crassa GENOME(Golden/ReferenceModel)
  // Golden/Reference Model
1  if [given SRA82660 subsequence does not map to golden model]
2      Conclusion: The given SRA82660 subsequence is not part of the Neurospora crassa species.
3  elseif [given SRA82660 subsequence maps to golden model]
4      Conclusion #1: The given SRA82660 subsequence is part of the genome.
5  else [Condition]
6
7  else
8
9  BODY OF THE PROCEDURE
  // What is the output of this procedure?
10 return
```
